

Security Awareness PhishingBox

NEOnet

Prompt. Courteous. Knowledgeable.
Support *you* deserve.

PhishingBox is an online tool for performing social engineering testing. With PhishingBox, easily conduct simulated phishing attacks to test and train employee security awareness. The human element is often the weakest component in a company's security, and attackers exploit this fact. Phishing attacks are on the rise and more sophisticated than ever. PhishingBox lets you control every aspect of your phishing awareness program with pre-configured customizable tests and online courses. Keep your employees at the highest level of security awareness through continuous training and testing.

Service Features

- Phish - Continuously phish your employees to maintain a high level of security awareness. Our System has pre-configured phishing templates or you can build your own.
- Train - Train your employees on the risk and prevention of phishing using teachable moments or complete courses. Select from our established courses or create your own.
- Analyze - Analyze test results and validate security awareness with robust reporting. Obtain aggregate reports or get details on specific personnel.
